## **Idea Title**

Rain-Responsive Jacket with Automatic Hood System

## **Problem Statement**

People often get caught in sudden rain and do not have enough time to cover their head or hair if they are using their hand carrying something or while cycling can be cause inconvenience. This can cause discomfort and wet hair.

## **Need**

- Protection from unexpected rain
- Hands-free solution for covering head and hair
- Comfortable and quick response to weather changes

## **Want**

- A stylish and futuristic jacket
- Automatic hood that deploys instantly when it starts raining
- Lightweight and comfortable for daily use

## **Proposed Solution / Idea Description**

The jacket is designed with a moisture sensor that detects rainfall. When rain starts, the hood automatically pops out and covers the user's head and hair instantly. Once the rain stops, the hood can retract back into the collar.
